10th September 2010

TO WHOM IT MAY CONCERN

This is to confirm that a Test Evaluation Trial of the AIRCOSAVER ENERGY SAVING DEVICE of East African Wind Energy Ltd was completed on an 18,000 BTU LG Split Air Conditioning unit located in the Renal Unit at Pandya Memorial Hospital, Mombasa, between the dates of 10th August and 19th August 2010.

The Test Evaluation Report dated 19th August 2010, showed an energy saving of 27% recorded by a data logger and was completed and verified by our Maintenance Engineer, which equates to a Return on Investment of 6 Months.

As a result, Pandya Memorial Hospital presented these findings at a Board Meeting held on 31st August 2010. It was decided that the procurement and installation of the AIRCOSAVER for all our Air Conditioning units should be carried out as soon as possible.

East African Wind Energy Ltd was handed an LPO on 3rd September 2010 for a total of 30 Units as phase 1 of the order.

We would have no hesitation in recommending this product to potential clients as a cost-effective way to reduce electrical consumption.

We commend East African Wind Energy Ltd for launching this innovative product.

Yours faithfully

PANDYA MEMORIAL HOSPITAL
