To Whom It May Concern

RE: Airco Saver: Energy Saving Device

This is to confirm that, we tested & installed AIRCOSAVER energy saving device of sbEnergy Ltd. on our various split Air conditioning unit located at Banani, Dhaka in September 2010. The report showed an average energy saving of 21% recorded by a data logger and was completed and verified by our maintenance engineer. In our professional opinion, AIRCOSAVER has proven substantial energy saving potential without compromising cooling comfort.

We would have no hesitation in recommending AIRCOSAVER to potential clients as a cost effective way to reduce electrical consumption.

We commend sbEnergy Ltd. for launching this innovative product in Bangladesh.

Yours Faithfully,

Rashed Habibullah
